**UNGEFASSTER BRILLANT.**

Ungefasster Brillant von 6.03 ct, D/IF, Typ IIA. Mit GIA Report Nr. 1146762802, begleitet von einem zusätzlichen Bestätigungsbrief vom Gemmological Institute of America für seine Identifizierung als Typ IIA. Typ IIA entspricht der chemisch reinsten Diamantgruppe und besitzt eine ausserordentliche optische Transparenz. Weniger als 2% aller Edelstein-Diamanten gehören zum Typ IIA. Die Typ IIA-Gruppe wurde zuerst für Diamanten von indischer Herkunft (besonders aus der Golconda Region) bestimmt, aber seither werden in allen bedeutenden Diamant-Vorkommen der Welt solche Diamanten gefunden. Dazu gehören berühmte Diamanten wie zum Beispiel der Cullinan I von 530.20 ct und der Koh-i-noor von 105.60 ct.

style="color:#747474 !important;">

Dieser Brillant wurde aus einem Rohdiamant von 15.93 ct geschliffen. Fundort des Rohsteines ist die Mine Letseng, in den Maluti Bergen von Lesotho. Während mehr als 3 Monaten wurde der Diamant mit hochmoderner Technologie und Ausrüstung von der weltweit tätigen Brachfeld-Group geschliffen um den höchsten Schliffgrad zu erreichen: Excellent Cut, Polish und Symmetrie.

**DIAMOND TYPE CLASSIFICATION FOR GIA DIAMOND GRADING REPORT #1146762802**

Scientists classify diamonds into two main "types" - type I and type II - based on the presence or absence of nitrogen which can replace carbon atoms in a diamond's atomic structure. These two diamond types can be distinguished on the basis of differences in their chemical and physical properties. Type II diamonds contain little if any nitrogen and they are subdivided into two groups (IIa and IIb) both of which are quite rare (less than 2% of all gem diamonds).

According to the records of the GIA Laboratory, the 6.03 carat Round Brilliant diamond described in GIA Diamond Grading Report #1146762802 has been determined to be a **type IIa** diamond. Type IIa diamonds are the most chemically pure type of diamond and often have exceptional optical transparency. Type IIa diamonds were first identified as originating from India (particularly from the Golconda region) but have since been recovered in all major diamond-producing regions of the world.

Among famous gem diamonds, the 530.20 carat Cullinan I and the 105.60 carat Koh-i-noor are examples of type IIa.
