Agassiz, Louis, Naturforscher (1807-1873).

Eigenh. Brief mit Unterschrift.

Cambridge (Massachusetts), 1855. 4°. 1 S. (Faltspuren).

It will give me great pleasure to give you such letters of introduction for my friends in Germany as may be useful in your studies. Allow me however to state that unless your special objects be to study chemistry with Professor Wöhler in Göttingen, you would do better to select either Berlin or Munich for the study of the other branches of Nat[ural] Hist[ory]. For mining you can not select better than Freiberg. - Agassiz, bekannt für seine bahnbrechenden Arbeiten zur Eiszeitforschung, lehrte seit 1847 als Professor

Dear Sir,

It will give me great pleasure to give you such letters of introduction for any friends in Germany as may be useful in your studies. Allow me however to state that ^{under} your special objects be to study Chemistry with Professor Wöhler in Göttingen, you would do better to select either Berlin or Munich for the study of the other branches of Nat. Hist. For mining you can not select better than Freiberg.

Let me know whether you are actually bound for Göttingen & I will send you letters accordingly.

Yours very truly
J. H. Paine
Cambridge 5th Decr 1855.

James P. Kimball, Esq. Salem.
