REPORT OF GEMMOLOGICAL EXAMINATION No. 19-B-4693

Description: One ring in yellow gold set with one polished and cabochon gemstones.

Total weight: 4.20 g.

Breaks of gemstones: 1 cabochon cut and 41 round single cut.

Identification: **Ruby¹ (variety of corundum) - Diamond²**

Geographical origin: **Myanmar (Burmese)¹.**

The physical and chemical characteristics of the observed ruby are similar to those found in rubies from Myanmar (formerly Burma).

Treatment: **No indications of thermal treatment (NTE)¹.**

Conclusion: The examined gemstones are of natural origin.

Comments: None.

The gemmologist specialist has been careful not only of the care and use for reported of any fine with the presence of all identical visible inclusions. The validity of the document is subject to the conditions printed.

Dubai, 17 June 2019
