UV - Fluoreszenz: faint to medium blue (LW), faint yellow (SW)

UV - fluorescence: faint to medium blue (LW), faint yellow (SW)

***Kommentar/Comment:**

The diamond has a potential clarity of IF after recutting;

all clarity characteristics are surface reaching and

relatively shallow, and can be removed if the resulting

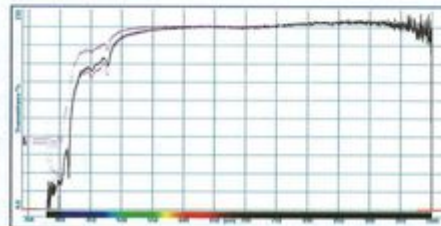

weight loss is acceptable.

Für die Richtigkeit des Gutachtens:

For the correctness of this report:

Thomas Hainschwang, DUG, GG, FGA, Experte SGG

Explanation of the graph: In addition to a diamond grader the diamond's colour has been analyzed by the SAS2000 spectrophotometer. In this method the spectrum of a stone is compared to reference spectra of GIA master diamonds. See explanations on the reverse side of this report.
