Diamond Report No. **2578/10**

Ursprung und Diamanttyp Origin and diamond type	natural diamond, type IaA>>B	
Form und Schliff Shape and cut	round brilliant cut	
Messwerte und Gewicht Measurements and weight	Durchmesser, Höhe, Diameter, depth 10.53 x 10.44 x 5.70 mm Gewicht, Weight 3.74 ct	
Proportionen Proportions	Tafel, Table 66 % Oberteil - Winkel, Crown - angle 30° (crown height 10%) Dicke der Rundste, Girdle thickness medium, bruted Gesamthöhe, Total depth 54.4 % Unterteilhöhe, Pavilion depth 43 % Grösse der Krallette, Culet size small	
Schliffausführung Finish	Zustand des Schliffes, Polish fair Symmetrie, Symmetry good	Symbolbedeutung: Key to symbols:  Cloud*  Feather  Pinpoint * Part of the stone contains tiny particles forming a very low relief cloud
Schliffgrad Cut grade	good	
Reinheit Clarity	Erscheinungsbild, Visual appearance minor inclusions	VS 2 Grad / Grade
Farbe Colour	Erscheinungsbild, Visual appearance near colourless UV - Fluoreszenz, UV - Fluorescence Faint blue (LW), none (SW)	H Grad / Grade

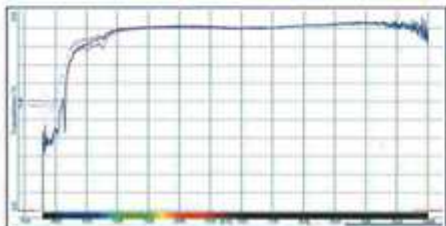

Balzers, am 31.03.2010

Für die Richtigkeit des Gutachtens:
For the correctness of this report:

Thomas Hainschwang, DÜG, GG, FGA, Experte SGG

Explanation of the graph: In addition to a diamond grader the diamond's colour has been analysed by the SAG2000 spectrophotometer. In this method the spectrum of a stone is compared to reference spectra of GIA master diamonds. See explanations on the reverse side of this report.
