---

36.8 mm.

Ref. 6265 is the 7th model of the Oyster Cosmograph series and was produced from 1971 up to 1988. Cal. 727 is more precise and better as the previous models 72B and 722-1. The important improvements are the change of the balance bridge and the 21,600 beats per hour of the new beryllium balance instead of the previous 18,000 beats per hour. With box, warranty and instructions.

CHF 25 000 / 35 000
