REPORT OF GEMMOLOGICAL EXAMINATION **No. 19-B-4693**

Description: One ring in yellow gold set with one polished and cabochon gemstones.

Total weight: 14.20 g.

Details of gemstones: 1 oval mixed cut and 40 round single cut.
Calculated total weight: ~1.5 ct¹ and 0.4 ct.

Identification:	Ruby¹ (variety of corundum) - Diamond²
------------------------	--

Geographical origin: **Myanmar (metamorphic)¹.**

The physical and chemical characteristics of the observed ruby are similar to those found in rubies from Myanmar (formerly Burma).

Treatment: **No indications of thermal treatment (NTE)¹.**

Conclusions: The examined gemstones are of natural origin.

Comments: None.

The gemmological expertise has been carried out with all due care and can be regarded as very fine within the framework of scientific and state-of-the-art technology. The validity of the document is subject to the conditions printed below.
