

Breguet, very rare and exceptional Tourbillon, ca. 2001.

Pink gold 750.

D 41.5 mm.

This masterpiece was produced in a small series in 2001, to commemorate the 200th anniversary of the tourbillon. In 1801, Breguet patented this ingenious invention: The complete escapement system was built into a fine "cage" and additionally rotated around its axis. This allowed Breguet to compensate for rate inaccuracies while wearing his pocket watches. Reference No. 1801. Case No. 751 L with engine-turned, sprung cover and sapphire glass exhibition back. Dial: Silver, engine-turned dial No. 751 with blued Breguet hands. Movement: Very fine hand-wound movement
